

At Hinkley Point C we've created lots of places for insects to find shelter.

HOW TO BUILD A BUG HOTEL

HPC Inspire

At Hinkley Point C we're committed to increasing biodiversity. At the southern area of our site we've planted thousands of trees, shrubs and built our own bug hotels creating new habitats for wildlife to enjoy!

This bug hotel is an easy way for you to encourage more wildlife into your own garden, giving them a sheltered safe space to live.

You will need...

- ▶ A large plastic bottle
- ▶ A nail to make holes
- ▶ Dry leaves, moss, twigs
- ▶ Something heavy to weigh it down
- ▶ Scissors
- ▶ And an adult to help!

Step by Step Guide...
